

Municipal Corporation Jalandhar

To

The District Education Officer (S) & (P) Jalandhar.

No. PA/2023/ 303- 304

Date 04/08/2022

I hope this letter finds you in good health. This is to express my concern about the increasing cases of dengue fever in our community. Dengue fever is a serious mosquito-borne illness that has been affecting our region. With the onset of the monsoon season, the risk of dengue transmission tends to rise due to the proliferation of mosquitoes. This presents a significant concern for the health and well-being of our students, staff, and their families.

I request you to direct the students to wear full sleeves shirts and full trousers to prevent mosquito bite as mosquito activity is on peak during morning. Cleanliness of schools are also to be taken care. Please look for any stagnant water or clean water collected near or in the premises. Preventive measures are also to be taken like mosquito sprays, reducing mosquito breeding sites etc.
